Minus 148 is one of the few true classics in the literature of mountaineering. It is no simple tale of heroism and valour, like Annapurna, but rather a vexed, uneven story of doubt, failure, whim, courage, tragedy. The expedition was unbalanced, with the strong members far superior to the others. Perhaps the strongest of all was killed in an absurd accident within the first hours. The leader himself seemed to lose heart in mid-stream. Yet everything was redeemed by the magnificent accomplishment of the summit in early March, and then by the even more magnificent survival of Art, Dave Johnston, and Ray Genet.

Details the author and his partner Willi Unsoeld's ascent of Everest's West Ridge in 1963.

Willi Unsoeld became an international hero during the Kennedy years, when he emerged as probably the greatest American climber of the Himalayan golden age. Displaying the sort of vigor that President Kennedy so admired, Unsoeld became the most visible hero of an ascent of Everest's previously-unclimbed West Ridge -- an ascent that cost him parts of both feet and nearly his life. His casual fearlessness and physical power established the template for extreme adventure, and his lectures as a charismatic professor inspired the generation of the sixties to test itself in acts of physical daring. Fatal Mountaineer sets Willi Unsoeld's intense life against the story of two defining adventures: the triumph on Everest and a more ill-starred expedition in 1976, when he led a group of mountaineers up a new route on Nanda Devi, the tallest peak in India. One of that gifted group of climbers was Willi's daughter, Devi -- a golden girl named for the mountain she sought to ascend with her beloved father. The intense rivalries within the expedition team, and the dangers of the route, led to an outcome darkened by tragedy, an outcome that continues to fuel one of the most tormenting debates in mountaineering history. Blending adventure with a frank look at the cultural background, Fatal Mountaineer considers the pressures on mountaineers in a period of our history torn by conflict. It balances hunger for fame with stark tragedy, a man's ambition with a father's love. Unsoeld emerges as an American classic, a self-invented genius of adventure to rank with Mark Twain or Will Rogers for sheer attractiveness. Under the close scrutiny of this thrilling story, his heroism turns out to be deeply authentic-as does his suffering.

The emphasis here is on their "golden age" in the 1980s and 1990s when, despite the economic and social baggage of their struggling country, Polish climbers were the first to tackle the world's highest mountains during winter, including the first winter ascents on seven of the world's fourteen 8000-meter peaks: Everest, Manaslu, Dhaulagiri, Cho Oyu, Kanchenjunga, Annapurna, and Lhotse. Such successes, however, came at a serious cost: 80 percent of Poland's finest high-altitude climbers died on the high mountains during the same period they were pursuing these first ascents. Award-winning writer Bernadette McDonald addresses the social, political, and cultural context of this golden age, and the hardships of life under Soviet rule. Polish climbers, she argues, were so tough because their lives at home were so tough--they lost family members to World War II and its aftermath and were so much more poverty-stricken than their Western counterparts that they made much of their own climbing gear. While Freedom Climbers tells the larger story of an era, McDonald shares charismatic personal narratives such as that of Wanda Rutkiewicz, expected to be the first woman to climb all 8000-meter peaks until she disappeared on Kanchenjunga in 1992; Jerzy Kukuczka, who died in a fall while attempting the south face of Lhotse; and numerous other renowned climbers including Voytek Kurtyka, Artur Hajzer, Andrej Zawaka, and Krzysztof Wielicki. This is a fascinating window into a different world, far-removed from modernity yet connected by the strange allure of the mountain landscape, and a story of inspiring passion against all odds. In July 1967, seven young men--members of Joe Wilcox's twelve-man expedition--died on Mt. McKinley, North America's highest peak, stranded at 20,000 feet during a vicious Arctic storm. Ten days passed with no rescue attempt; the bodies were never recovere

In this revised and updated third edition, Bill Sherwonit brings to life the adventure, heroism, triumph, and tragedy of climbing North America's highest peak, Denali. He offers great insight and tales of daring adventure for both experienced climbers and armchair explorers who wonder why people climb mountains. The book contains stores about some of the best known personalities associated with the mountain from Bradford Washburn to Vern Tejas. Sherwonit has added new records and climbing data along with some stories of new faces who have attempted the climb. He also updated the Park Service rules regarding climbing Denali.

In a startling look at the classic Annapurna -- the most famous book about mountaineering -- David Roberts discloses what really happened on the legendary expedition to the Himalayan peak. In June 1950, a team of mountaineers was the first to conquer an 8,000-meter peak. Maurice Herzog, the leader of the expedition, became a national hero in France, and Annapurna, his account of the historic ascent, has long been regarded as the ultimate tale of courage and cooperation under the harshest of conditions. In True Summit, David Roberts presents a fascinating revision of this classic tale. Using newly available documents and information gleaned from a rare interview with Herzog (the only climber on the team still living), Roberts shows that the expedition was torn by dissent. As he re-creates the actual events, Roberts lays bare Herzog's self-serving determination and bestows long-delayed credit to the most accomplished and unsung heroes. These new revelations will inspire young adventurers and change forever the way we think about this victory in the mountains and the climbers who achieved it.
