Make sure your personal details are entered correctly at the top of this sheet and on the answer sheet. Read each question carefully. Write your answers clearly on the answer sheet. Use blank paper for your workings out. Please hand these in at the end of the test. REMEMBER: YOU HAVE 1 HOUR AND 15 MINUTES TO FINISH THE TEST

Insurance restoration the repair of buildings damaged by water, fire, smoke, storms, and other disasters is an exciting and challenging field of construction. It also offers contractors lucrative work that's immune to economic downturns pipes still break, buildings still burn, and trees are still blown over, regardless of the economy. And with the insurance companies funding the repairs, your payment is virtually guaranteed. But not just anyone can repair fire- and water-damaged buildings. You need the knowledge and the equipment to get the job done right, and that's what this book is all about. From understanding fire repairs and smoke odors to restorative drying methods, mold remediation, and handling contents, you'll not only learn how to provide top-notch property and content restoration services, but also how to become the person homeowners and insurance companies turn to first in an emergency putting yourself first in line for all the best jobs.

(Black & White version) Fundamentals of Business was created for Virginia Tech's MGT 1104 Foundations of Business through a collaboration between the Pamplin College of Business and Virginia Tech Libraries. This book is freely available at: <http://hdl.handle.net/10919/70961> It is licensed with a Creative Commons-NonCommercial ShareAlike 3.0 license.

Microbes, especially molds and bacteria, growing in water-damaged buildings make people sick. The book follows *Mold Warriors* (published in 2005) as the definitive source of information on "mold" illness, its basis in inflammation, its physiology and its links to politics, lawsuits and science. It has true stories, regarding this increasingly common problem in the US and around the world. If you already know that you could be sickened by mold-damaged buildings, this book will guide you through diagnosis and treatment, through remediation and return to health.

This book sheds light on all aspects of earnings claims, including defining what an earnings claim really is, the origins of its regulation under the franchise disclosure laws, how a franchisor should prepare an earnings claim, how a franchisee should use an earnings claim, how a franchisee may attack lawful and unlawful earnings claims, how a franchisor may defend against such attacks, and how the government franchise enforcement authorities, investigate unlawful earnings claim activity.

This book investigates the learnability of various classes of classical categorial grammars within the Gold paradigm of identification in the limit from positive data. Learning from structure and learning from flat strings are considered. The class of k-valued grammars, for k = 1,2,3,..., is shown to be learnable both from structures and from strings, while the class of least-valued grammars and the class of least-cardinality grammars are shown to be learnable from structures. In proving these learnable results, crucial use is made of a theorem on the concept known as finite elasticity. The learning algorithms used in this work build on Buszkowski and Penn's algorithm for finding categorial grammars from input consisting of functor-argument structures.
